# 1. WatchDog Network Setup Instructions

---

## Introduction

This document is intended to help network technicians install the WatchDog. It briefly describes how to setup the network configuration of the WatchDog.

## WatchDog Setup

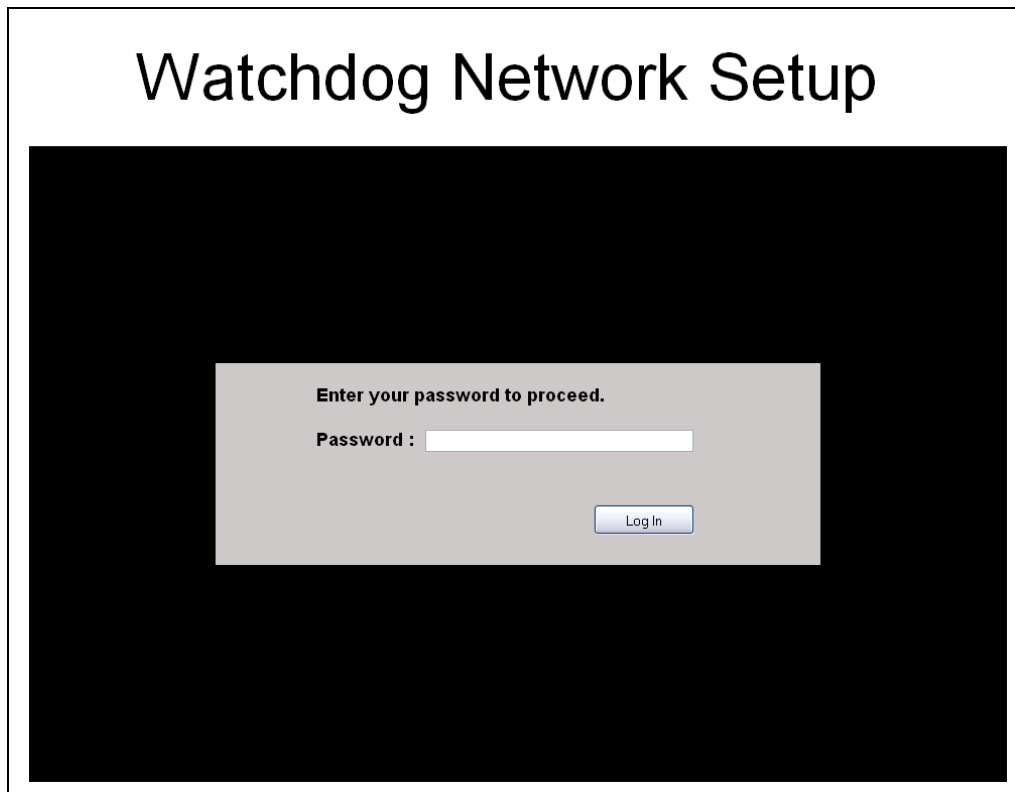

The WatchDog's WAN (Wide Area Network) port default is setup as a DHCP (Dynamic Host Configuration Protocol) Client. The script to configure the port is only executed on start-up. To pull down an IP (Internet Protocol) address, it needs to be attached to a DHCP Server when it is booted.

The MAC (Media Access Control) address is printed on a label that is attached to the front of the WatchDog board.

## Configuring the WatchDog Network Settings

To access the WatchDog setup, connect a computer to the LAN (Local Area Network) port of the board, using a CAT5 network cable. Make sure the red "SYS" LED is illuminated on the board, as this ensures the Operating System (OS) has booted completely.

Open a web browser (i.e. Internet Explorer, Mozilla Firefox ...) and type "192.168.1.200" into the URL bar (where you would normally type [www.google.com](http://www.google.com) for example). This will bring up a login screen as shown in [Figure 1A](#).

**Figure 1A** Login Screen

The default password is "default". The password is the same as is used to access the WatchDog. Therefore, if the user has changed the password, the setup password will be whatever they have changed it to. If the user forgets his/her password, see the user manual for resetting the password.

Once logged in, [Figure 1B](#) should be displayed on your screen.

The screenshot shows a web interface titled "Watchdog Network Setup". It is divided into two main sections. The left section, "WatchDog Network Status", displays the current WAN port configuration: IP Address: 10.2.5.130, Subnet Mask: 255.255.255.0, Gateway: 10.2.5.1, DNS1: 172.20.63.1, and DNS2: 172.20.63.2. The right section, "Configure WatchDog Network", prompts the user to "Setup the WAN port for DHCP or Static IP:" and features a "Configure" button.

**Figure 1B** Network Status Screen

The current setup is displayed to the left of this screen. Of course, your address will differ from [Figure 1B](#). If the device is setup as a DHCP Client and the IP address that is displayed is "10.11.12.1", this means the DHCP Server did not serve the board an IP address. If you were expecting the board to pull down an IP address, reset the power ON the modem/router and then the WatchDog board. If these addresses need to be modified, click the "Configure" button to the right. This will take you to [Figure 1C](#).

The screenshot shows a web interface titled "Watchdog Network Setup". The main content area is titled "Connection Method:" and instructs the user to "Choose between DHCP and Static IP for the WAN port". There are two radio button options: "DHCP (Automatically obtain an IP Address)" and "Static IP (All Fields Required)". At the bottom of the form, there are two buttons: "Apply Settings" and "Cancel".

**Figure 1C** Network Configuration

## 1. WatchDog Network Setup Instructions

At first, neither DHCP or Static is selected. Choose one or the other depending on how you would like to setup the WatchDog's network parameters. If "Static IP" is selected, the following fields are displayed for entry: IP Address, Subnet Mask, Default Gateway, DNS 1 and DNS 2. [Figure 1D](#) depicts these entries.

The screenshot shows a web-based configuration interface titled "Watchdog Network Setup". Under the heading "Connection Method:", there is a sub-instruction: "Choose between DHCP and Static IP for the WAN port". Two radio buttons are present: "DHCP (Automatically obtain an IP Address)" which is unselected, and "Static IP (All Fields Required)" which is selected. Below the radio buttons, there are five rows of input fields, each with a label and a four-part dotted box for IP address entry: "Static IP:", "Subnet Mask:", "Default Gateway:", "DNS 1:", and "DNS 2:". At the bottom right of the form area, there are two buttons: "Apply Settings" and "Cancel".

**Figure 1D** Enter Static IP Parameters

Note that all fields are required when using the Static IP option. If you are missing any of the addresses, contact your service provider and they will be able to give you the missing information.

Once you have chosen the setup that you would like, click "Apply Settings". After clicking the button you will be redirected to a page that counts down from ninety (90) seconds. This is changing the board's configuration and resetting it so the changes will take effect. The network scripts only execute on boot, so the WAN port on the board needs to be connected to the modem/router on boot.

After the timer expires, you will be redirected back to the Network Status screen [on Page 5](#). If the page does not display the addresses correctly, make sure the red LED on the WatchDog board is ON and then refresh the web page.

### Configuring a Modem/Router

If the WatchDog board is connected to a modem/router that is configurable, listed below are a few recommendations for setting them up. The methods below do not cover every configuration that is available. If the modem is not configurable, refer to [Figure 1C on Page 5](#) for setting the WatchDog Network to the static IP allocated by your service provider.

#### Static IP

This is the preferred method for installation. Acquire the LAN's default gateway address of the modem/router. Replace the last number of the default gateway with a number that is not within the DHCP pool range. For example, if the default gateway is 192.168.2.1 and the modem/router's DHCP pool range is 100 to 200, replace the last number of the default gateway address with, say, 50. This would result in an address of 192.168.2.50. Using the WatchDog Network setup screens, set the static IP address of the board to your chosen IP address, refer to [Figure 1D on Page 6](#).

In the router/modem configuration, forward incoming request on ports 22, 23 and 80 to the static IP.

#### DHCP Pool

If the modem/router does not have DHCP reservations, the board can be allowed to pull an IP address from the DHCP server's IP range. This method is only recommended when the WatchDog is the only node on the network.

Reduce the IP range of the DHCP server down to one IP address. This will be the only IP address that the DHCP server is allowed to serve to the network. Once the range has been narrowed to one, forward incoming request on ports 22, 23 and 80 to the single IP address.

#### DHCP Reservations

A reservation can be an option in the configuration of a modem/router. It can be set to serve a given MAC address with a certain IP address when it is introduced to the network. As mentioned above, the MAC address of the WatchDog board can be found on a label on the front of it.

Once the IP address has been setup for the MAC address, forward incoming request on ports 22, 23 and 80 to the board.

---

# NOTES

## GSI Group, LLC Limited Warranty

The GSI Group, LLC ("GSI") warrants products which it manufactures to be free of defects in materials and workmanship under normal usage and conditions for a period of 12 months after sale to the original end-user or if a foreign sale, 14 months from arrival at port of discharge, whichever is earlier. The end-user's sole remedy (and GSI's only obligation) is to repair or replace, at GSI's option and expense, products that in GSI's judgment, contain a material defect in materials or workmanship. Expenses incurred by or on behalf of the end-user without prior written authorization from the GSI Warranty Group shall be the sole responsibility of the end-user.

### Warranty Extensions:

The Limited Warranty period is extended for the following products:

	Product	Warranty Period	
<b>AP Fans and Flooring</b>	Performer Series Direct Drive Fan Motor	3 Years	* Warranty prorated from list price: 0 to 3 years - no cost to end-user 3 to 5 years - end-user pays 25% 5 to 7 years - end-user pays 50% 7 to 10 years - end-user pays 75%
	All Fiberglass Housings	Lifetime	
	All Fiberglass Propellers	Lifetime	
<b>AP and Cumberland</b>	Flex-Flo/Pan Feeding System Motors	2 Years	** Warranty prorated from list price: 0 to 3 years - no cost to end-user 3 to 5 years - end-user pays 50%
<b>Cumberland Feeding/Watering Systems</b>	Feeder System Pan Assemblies	5 Years **	
	Feed Tubes (1-3/4" and 2.00")	10 Years *	
	Centerless Augers	10 Years *	
	Watering Nipples	10 Years *	
<b>Grain Systems</b>	Grain Bin Structural Design	5 Years	† Motors, burner components and moving parts not included. Portable dryer screens included. Tower dryer screens not included.
<b>Grain Systems Farm Fans Zimmerman</b>	Portable and Tower Dryers	2 Years	
	Portable and Tower Dryer Frames and Internal Infrastructure †	5 Years	

GSI further warrants that the portable and tower dryer frame and basket, excluding all auger and auger drive components, shall be free from defects in materials for a period of time beginning on the twelfth (12<sup>th</sup>) month from the date of purchase and continuing until the sixtieth (60<sup>th</sup>) month from the date of purchase (extended warranty period). During the extended warranty period, GSI will replace the frame or basket components that prove to be defective under normal conditions of use without charge, excluding the labor, transportation, and/or shipping costs incurred in the performance of this extended warranty.

### Conditions and Limitations:

THERE ARE NO WARRANTIES THAT EXTEND BEYOND THE LIMITED WARRANTY DESCRIPTION SET FORTH ABOVE. SPECIFICALLY, GSI MAKES NO FURTHER WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING, WITHOUT LIMITATION, WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR USE IN CONNECTION WITH: (I) PRODUCT MANUFACTURED OR SOLD BY GSI OR (II) ANY ADVICE, INSTRUCTION, RECOMMENDATION OR SUGGESTION PROVIDED BY AN AGENT, REPRESENTATIVE OR EMPLOYEE OF GSI REGARDING OR RELATED TO THE CONFIGURATION, INSTALLATION, LAYOUT, SUITABILITY FOR A PARTICULAR PURPOSE, OR DESIGN OF SUCH PRODUCTS.

GSI shall not be liable for any direct, indirect, incidental or consequential damages, including, without limitation, loss of anticipated profits or benefits. The sole and exclusive remedy is set forth in the Limited Warranty, which shall not exceed the amount paid for the product purchased. This warranty is not transferable and applies only to the original end-user. GSI shall have no obligation or responsibility for any representations or warranties made by or on behalf of any dealer, agent or distributor.

GSI assumes no responsibility for claims resulting from construction defects or unauthorized modifications to products which it manufactured. Modifications to products not specifically delineated in the manual accompanying the equipment at initial sale will void the Limited Warranty.

This Limited Warranty shall not extend to products or parts which have been damaged by negligent use, misuse, alteration, accident or which have been improperly/inadequately maintained. This Limited Warranty extends solely to products manufactured by GSI.

Prior to installation, the end-user has the responsibility to comply with federal, state and local codes which apply to the location and installation of products manufactured or sold by GSI.

This equipment shall be installed in accordance with the current installation codes and applicable regulations, which should be carefully followed in all cases. Authorities having jurisdiction should be consulted before installations are made.
