

# GRAINVIZ

INDIVIDUAL BUSHEL MANAGEMENT

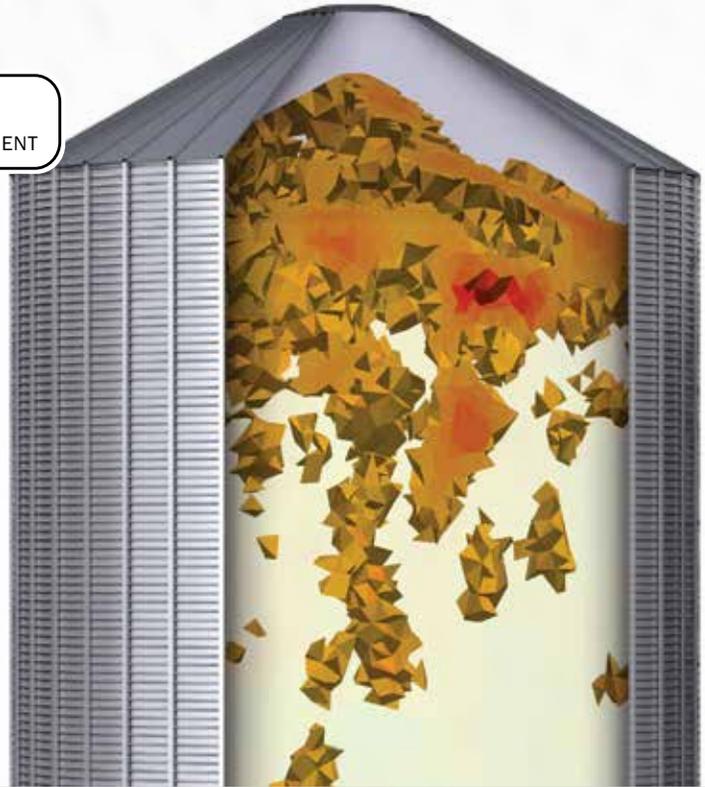

**PROVEN & DEPENDABLE™**

[WWW.GRAINSYSTEMS.COM](http://WWW.GRAINSYSTEMS.COM)

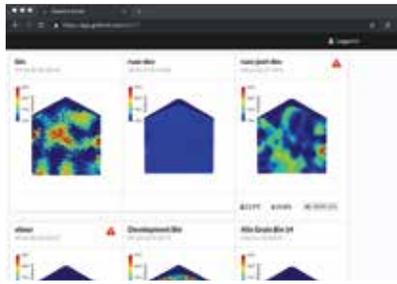

### GRAIN BIN MANAGEMENT BY THE BUSHEL

You make the best decisions when you can see the whole picture. Unlike systems that only monitor conditions in close proximity to cables, GrainViz from GSI uses technology similar to an MRI or CT scan to create a 3D image map showing the moisture content of each individual bushel of grain and its location in a steel storage bin. So, you can maximize weight, understand inventory and proactively address potential issues before they become a problem.

### REMOTE MANAGEMENT

Monitor and manage grain conditions, control fans and accurately understand the volume of your stored grain through any web-enabled device. Receive automatic alerts when potential moisture issues are detected, which means there is no need to enter a bin to check conditions.

#### MAXIMIZE WEIGHT

All bushels are not created equal - Manage the moisture content of each bushel to get the most from your grain.

#### SAVE ENERGY

Optimize fans based on grain moisture and local weather to save money on energy and ensure you're not over-drying.

#### BE PROACTIVE

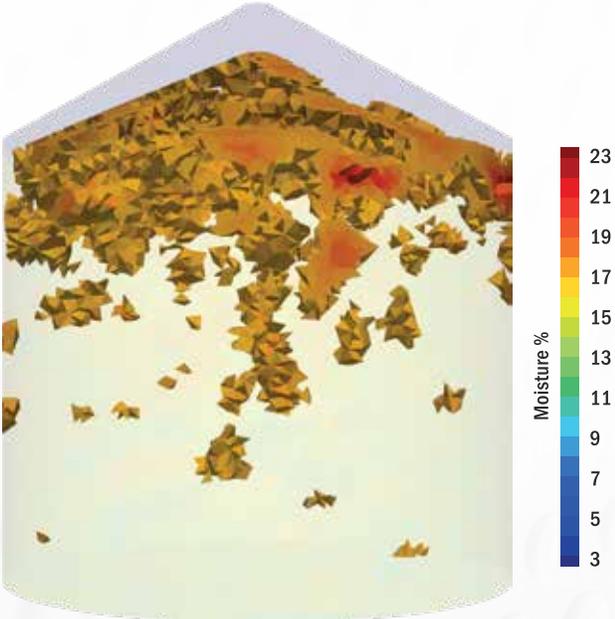

Address potential issues before they become a problem.

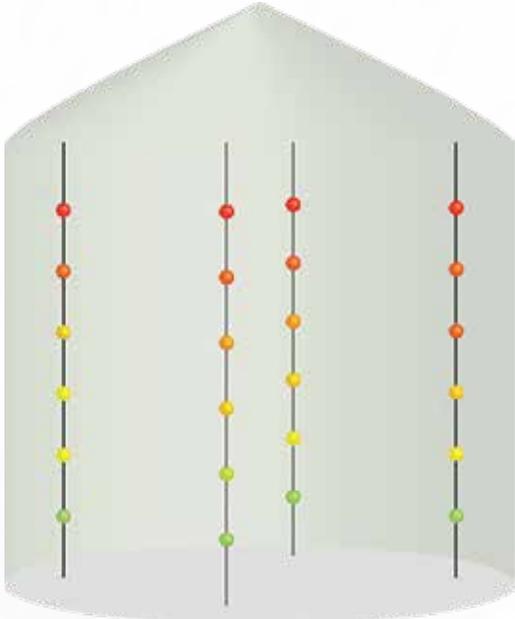

## COMPARE GRAINVIZ WITH TRADITIONAL CABLE SYSTEMS:

GRAINVIZ SYSTEM	TRADITIONAL CABLE SYSTEMS
View 100% of the moisture content.	View 3-5% of the moisture content.
Address potential issues before they become a problem.	Reports problem spots after they are an issue.
Monitor and manage each individual bushel of grain.	Monitors only a small radius around cables which can leave large pockets unmonitored.
Quick and accurate inventory reporting. Eliminates the need to enter a bin for physical measurement.	No inventory reporting.
Detect human, insect or rodent activity.	Can detect insect activity after it is an issue.

### BIN MONITORING WITH GRAINVIZ

# COMPLETE YOUR GSI SYSTEM

WWW.GRAINSYSTEMS.COM

## 40-SERIES™ GRAIN BINS

When determining the best system for your operation, we know that what is protected inside the bin is what counts the most. Every product we design, engineer and build is based on this foundation.

## DRYING AND CONDITIONING

Today's farm operations have greatly varied needs for their drying solutions. Size, type, and investment all play a part in the decision for which to use. GSI provides systems of every size and type to help with those needs. Options include TopDry, Portable, Modular, and T-Series Tower Dryers.

## MATERIAL HANDLING

With lines of GSI and InterSystems Material Handling, we offer the broadest product portfolio of proven and dependable equipment in the industry. We design and manufacture products that withstand the conditions of any commercial grain facility, while handling the grain with care and efficiency.

## GLOBAL SOLUTIONS. LOCAL SUPPORT.

GSI and GSI Dealers alike share the same passion and commitment to our customers. GSI Dealers and contractors understand down time is not an option, construction schedules must be met. From site planning to installation and service, GSI Dealers and contractors are the proven partners for your operation. When you buy GSI, you get the quality product of a worldwide leader and the dependable service of your local Dealership.
