1. Safety

Safety Guidelines

Safety guidelines are general-to-specific safety rules that must be followed at all times. This manual is written to help you understand safe operating procedures and problems that can be encountered by the operator and other personnel when using this equipment. Save these safety guidelines for future reference.

As owner or operator, you are responsible for understanding the requirements, hazards, and precautions that exist and to inform others as required. Unqualified persons must stay out of the work area at all times.

Alterations must not be made to the equipment. Alterations can produce dangerous situations resulting in SERIOUS INJURY or DEATH.

This equipment must be installed in accordance with the current installation codes and applicable regulations, which must be carefully followed in all cases. Authorities having jurisdiction must be consulted before installations are made.

When necessary, you must consider the installation location relative to electrical, fuel and water utilities. Personnel operating or working around equipment must read this manual. This manual must be delivered with equipment to its owner. Failure to read this manual and its safety instructions is a misuse of the equipment.

ST-0001-3
Cautionary Symbols Definitions

Cautionary symbols appear in this manual and on product decals. The symbols alert the user of potential safety hazards, prohibited activities and mandatory actions. To help you recognize this information, we use the symbols that are defined below.

**DANGER**
This symbol indicates an imminently hazardous situation which, if not avoided, will result in serious injury or death.

**WARNING**
This symbol indicates a potentially hazardous situation which, if not avoided, can result in serious injury or death.

**CAUTION**
This symbol indicates a potentially hazardous situation which, if not avoided, can result in minor or moderate injury.

**NOTICE**
This symbol is used to address practices not related to personal injury.

This symbol indicates a general hazard.

This symbol indicates a prohibited activity.

This symbol indicates a mandatory action.
1. Safety

Safety Cautions

Use Personal Protective Equipment

- Use appropriate personal protective equipment:
  - Eye Protection
  - Respiratory Protection
  - Foot Protection
  - Hearing Protection
  - Head Protection
  - Fall Protection
  - Hand Protection

- Wear clothing appropriate to the job.
- Remove all jewelry.
- Tie long hair up and back.

Follow Safety Instructions

- Warning: If the information in the manual is not followed exactly, a fire or explosion can result, causing property damage, personal injury or loss of life.
- Carefully read all safety messages in this manual and safety signs on your machine. Keep signs in good condition. Replace missing or damaged safety signs. Be sure new equipment components and repair parts include the current safety signs. Replacement safety signs are available from the manufacturer.
- Learn how to operate the machine and how to use controls properly. Do not let anyone operate without instruction.
- If you do not understand any part of this manual or need assistance, contact your dealer.
- Retain these instructions for future reference.
1. Safety

Maintain Equipment and Work Area

- Understand service procedures before doing work.
- Keep area clean and dry.
- Do not service equipment while it is operating. Disconnect and lock-out power and fuel supply before entering equipment or before performing maintenance.
- Keep your equipment in proper working condition. Replace worn or broken parts immediately.
- Depressurize the fuel train before disassembling for service.
- Allow the fan to operate for 20 minutes with the burner off to purge products of combustion and to cool the components before entering.
- Check regularly for any developing gas plumbing leaks. Do not operate the dryer if any gas leak is detected. Shut down and repair before further operation.

Prevent Roof Damage Due to Vacuum Pressure

- Roof damage can result from excessive vacuum or internal pressure from fans or other air moving systems. The manufacturer does not warrant this type of roof damage.
- Adequate ventilation or “makeup air” devices must be provided for all powered air handling systems.
- The manufacturer does not recommend the use of downward flow systems (suction).
- Severe roof damage can result from any blockage of air passages.
- Operating fans during high humidity or cold weather conditions can cause air exhaust or intake ports to freeze.

Unload the Bin Correctly

- Use CENTER FLOOR OUTLET ONLY until NO grain remains above this outlet.
- Side floor outlets to be used ONLY when above condition is satisfied.
- Lock all side floor outlets to avoid accidental premature use.
- See manufacturers instructions for proper use of factory supplied sidedraw (wall) discharge systems.
1. Safety

Handle and Use Equipment Properly

- Equipment is intended for the use of grain drying only. Any other use is a misuse of this equipment.

- The operating instructions in this manual pertain to the common cereal grains as indicated. When drying any other grain, contact GSI for additional recommendations.

- On LP fired units, set pressure regulator to avoid excessive gas pressure applied to the burner during ignition and operation. Do not exceed maximum recommended drying temperatures.

- Equipment has sharp edges that may cause serious injury. To avoid injury, handle sharp edges with caution and use proper protective clothing and equipment at all times.

- All guards must be in place before and during operation. Images of guards removed in this manual are for illustration purposes only.

- Use caution when working around high-speed fans, gas burners, augers and auxiliary conveyors which can start automatically.

- Keep hands, feet, and clothing away from moving parts.

- Do not bypass any safety device or interlock.

- Do not enter the dryer/bin while it is operating.

- Do not operate in an area where combustible material will be drawn into the dryer.

Stay Clear of Hoisted Equipment

- Always use proper lifting or hoisting equipment when assembling or disassembling equipment.

- Do not walk or stand under hoisted equipment.

- Always use sturdy and stable supports when needed for installation. Not following these safety precautions creates the risk of falling equipment, which can crush personnel and cause serious injury or death.
1. Safety

Do Not Enter Bin
- Rotating flighting will kill or dismember.
- Flowing material will trap and suffocate.
- Crusted material will collapse and suffocate.
  - If you must enter the bin:
    1. Shut off and lock out all power sources.
    2. Use a safety harness and safety line.
    3. Station another person outside the bin.
    4. Avoid the center of the bin.
    5. Wear proper breathing equipment or respirator.

Do Not Overfill the Bin
- Do not overfill bin. Stored grain must be no higher than the roof eaves at the outer edge.
- Filling the bin above this point creates excessive internal pressure and can cause swelling and eventual roof failure. The over filling of a bin can also cause the blockage of roof vents and eaves, which will lead to a build-up of air pressure causing roof damage.

Install and Operate Equipment Properly
- Make sure grain chutes are empty by performing a manual dump before entering the bin.
- Before attempting to remove and reinstall the fan blade, contact GSI for the recommended procedure.
1. Safety

Exercise Caution When Drying Flammable Grains

- Be aware that some grains are highly flammable including, but not limited to, rapeseed, canola, linseed, sunflower and milo.

- All grain and seed must be whole (minimal cracking or crushing), clean, and dust free before drying.

- Avoid dust and chaff from being drawn into the fan and heater.

- To reduce risk of fire, keep the fan, heater, drying plenum, and ducts clean at all times.

- In the event of a fire (or suspected fire):
  1. Shut down the entire dryer.
  2. Turn off the fuel at the tank or supply valve.
  3. Shut off and lock electrical power.
  4. Evacuate the area.
  5. Call the fire department.

For Your Safety

- If you smell gas:
  - Do not try to light any appliance.
  - Extinguish any open flames.
  - Do not touch any electrical switch.
  - Immediately call your gas supplier. Follow the gas supplier’s instructions.
  - If you cannot reach your gas supplier, call the fire department.

- The use and storage of gasoline and other flammable vapors and liquids in open containers in the vicinity of this appliance is hazardous.

- Improper installation, adjustment, alteration, service or maintenance can cause property damage, injury or death. Read the installation, operating and maintenance instructions thoroughly before installing or servicing this equipment. Installation and service must be performed by a qualified installer, service agency or the gas supplier.
Confined Space Hazards and Entry Procedures

- Note that the interior of this equipment is considered a confined space. Maintenance of this equipment can require access to the confined space.

- Access doors must be shut and locked except when access is required.

- Doors giving access to dangerous equipment must be safety interlocked.

- The following entry procedures must be followed:
  - Be aware of all possible hazards present inside the confined space and wear personal protective equipment (PPE) as needed.
  - Complete a permit to work and follow all permit required confined space entry procedures defined by the site manager.
  - Make sure that the area has been purged of any hazardous products or gases. Check the atmosphere for harmful gases or vapors with a suitable gas analyzer and make sure levels are safe before entering.
  - Do not smoke or use naked flames.
  - Lock out and tag out power supplies and fuel supplies to all equipment.
  - Do not work alone. Work in teams of at least three so that help is immediately available in the event of an emergency.
  - Confirm that all personnel have safely exited the equipment and tools have been recovered once work is complete.

Install and Operate Equipment Properly

- This product is intended for the use of grain storage only. Any other use is a misuse of the product.

Store Bin Sheets Properly

- Sidewall bundles or sheets must be stored in a safe manner. The safest method of storing sidewall bundles is by laying them horizontally with the arch of the sheet upward, like a dome.

- Sidewall sheets stored on edge must be secured so that they cannot fall over and cause injury.

- Use care when handling and moving sidewall bundles.
1. Safety

Safety Sign-Off Sheet

Below is a sign-off sheet that can be used to verify that all personnel have read and understood the safety instructions. This sign-off sheet is provided for your convenience and personal record keeping.

ST-0007
2. PLC Watchdog

PLC Watchdog Connection Tips

1. The system works best if the PanelView is set for a static IP from your LAN and you have a static IP assigned by your internet provider (ISP).

2. Ideally, someone familiar with network setup should configure the addresses in the PanelView, router, modem, etc.

   **NOTE:** *The IP address of the PanelView should not be altered. If altered, it can cause connection problems with the rest of the dryer.*

3. If you plan to access the PanelView from the WAN (outside your LAN), certain ports need to be forwarded in your router. The ports that need to be forwarded to the PanelView’s IP address is: 5900.

   a. If accessing the PanelView via router, remember to enter the gateway address of the router into the IP setup of the PanelView.

4. Possible Connection Errors

   a. Errors stating “Invalid Credentials” or the like often mean that there is a connection password set in the PanelView. If this system was purchased as a factory option on a dryer, the connection password will be the last four (4) digits of the order number. Refer to the PV+6 VNC Server Setup instructions on Page 15 for more information on configuring security.

   b. Errors such as “this port is blocked” or “could not connect to server” or “the target device actively refused the connection” can mean that the VNC Server is not turned ON in the PanelView. Refer to the PV+6 VNC Server Setup instructions on Page 15 for more information.
3. PanelView Server Setup Instructions

1. Press Info button. (See Figure 3A.)

![Figure 3A](image)

2. At this screen, press the upper left corner and it will take you to the next screen. (See Figure 3B.)

![Figure 3B](image)
PanelView Plus 6 VNC Server Setup

1. Navigate to this screen and select the “Exit” key. *(See Figure 3C.)*

![Figure 3C](image)

2. Press the Password button to go to this screen. *(See Figure 3D.)*

![Figure 3D](image)
3. PanelView Server Setup Instructions

3. Enter the word “password” and hit the Enter key. *(See Figure 3E.)*

**NOTE:** The password was “password” until mid 2016. Later units use “Gsi12345” for the password.

![Figure 3E](image)

4. Press the Enter key. *(See Figure 3F.)* You will exit to the Windows CE desktop. *(See Figure 3F.)*

![Figure 3F](image)

![Figure 3G](image)
3. PanelView Server Setup Instructions

5. Select Start, Settings and Control Panel as shown. *(See Figure 3H.)*

![Figure 3H](Image)

6. You should be at the screen below. *(See Figure 3I.)*

![Figure 3I](Image)
3. PanelView Server Setup Instructions

7. Double-click Server Config to be taken to this screen. (See Figure 3J and Figure 3K.)

8. Uncheck the box that says “View Only (no remote control)”. (See Figure 3L.)
3. PanelView Server Setup Instructions

9. Click “OK” to be taken to the next screen. *(See Figure 3M.)*

![Figure 3M](image)

10. Click “yes” to restart the services. *(See Figure 3N.)* You will then be taken back to this screen as shown in Figure 3O.

![Figure 3N](image)  ![Figure 3O](image)
3. PanelView Server Setup Instructions

11. Double-click on Services. (See Figure 3P.) The screen should look like as shown in Figure 3Q.

12. Press the View Point Server and VNC Server button and both should turn green. (See Figure 3R.)

13. Cycle power ON the PanelView to reload Factory Talk.

14. VNC programming is complete.
4. IP and DNS Setup Instructions

NOTE: Follow Steps 1 and 2 in Chapter 3 on Page 14 to get started with the below instructions.

1. Select Terminal Settings and press enter. (See Figure 4A.)

![Figure 4A](image)

2. Select Networks and Communications and press Enter. (See Figure 4B.)

![Figure 4B](image)
4. IP and DNS Setup Instructions

3. Select Network Connections and press Enter. (See Figure 4C.)

4. Select Network Adapters and press Enter. You now have buttons to change the IP or DNS addresses for the PanelView. (See Figure 4D.)
4. IP and DNS Setup Instructions

5. Select IP address to modify the IP or Gateway address of the PanelView. (See Figure 4E.)

NOTE:

a. We do not recommend changing the IP address of the PanelView as that can cause connectivity issues with the dryer.

b. The gateway address needs to match the address of your router or cell modem.

Figure 4E

6. IP addresses will typically be set as seen below. When finished, select Cancel to discard any changes or Enter to save the changes. (See Figure 4F.)

Figure 4F
4. IP and DNS Setup Instructions

7. You will then see the screen below. Press Name Servers to modify the DNS settings. (See Figure 4G.)

![Figure 4G]

8. Typical DNS settings using Google’s DNS servers are seen below. Press Primary DNS or Secondary DNS to make changes. (See Figure 4H.)

![Figure 4H]
9. Press OK to be taken back to the screen below. Continue to cancel out to get to the FactoryTalk menu. (See Figure 4I.)

Figure 4I

10. Restart terminal for settings to take effect.
5. Watchdog Messaging Email Server Setup

NOTE: These instructions assume that the HMI is already accessible from the WAN either through a cellular modem or through a properly configured router on the customer’s LAN.

1. Navigate to the Message Setup screen by going through the Help/Info, then Watchdog Messaging. (See Figure 5A.)

   ![Figure 5A]

2. Select Server Setup to get to the SMTP Server Configuration screen as shown in Figure 5B.

   ![Figure 5B]

   NOTE: Watchdog has been tested with GMAIL email service. The correct server address and port for GMAIL are shown above. The user will need to use a GMAIL account that they have administrative rights to.
3. Sending a test message. *(See Figure 5C.)*

![Figure 5C](image)

4. From the Message Setup screen, touch anywhere in the green box to open the keyboard. Then type your test message and press the enter key. *(See Figure 5D.)*

![Figure 5D](image)
5. Watchdog Messaging Email Server Setup

5. It should now look like this. Press the “Send Test Message” button and hold it for 1-2 seconds and the message should send. (See Figure 5E.)

![Figure 5E](image)

6. Is successful, you should have the message below. (See Figure 5F.)

![Figure 5F](image)
Common Error Messages and Causes

**NOTE:** The cause of the error is displayed in the “Body” field.

- Test - networking gateway IP not correct.
- Test - networking name servers not specified in Windows.
- Test with no internet connection.

![Figure 5G](image1)
![Figure 5I](image2)
![Figure 5H](image3)
![Figure 5J](image4)
5. Watchdog Messaging Email Server Setup

**Figure 5K**

Server config test - wrong server address.

**Figure 5L**

Server config test - wrong password.

**Figure 5M**

Server config test - SSL disabled.
6. PLC Watchdog Messaging Setup and Operation

1. Select Help/Info and then select Watchdog Messaging from the screen as shown in Figure 6B.

2. You will now see the Message Setup screen. (See Figure 6C.)
6. PLC Watchdog Messaging Setup and Operation

3. Press Recipient Setup to begin setting up the message recipients. You will be taken to the following screen. (See Figure 6D.)

![Figure 6D](image1)

4. Press Recipient 1 Setup. This will take you to the Recipient # 1 display. To send an email message, go to Step 5 on Page 33. To send a text, skip Step 7 on Page 34. (See Figure 6E.)

![Figure 6E](image2)
6. PLC Watchdog Messaging Setup and Operation

5. To send the message to an email recipient, press the radio button next to “Send to Email Account”. (See Figure 6F.)

6. Click on the blue Email entry box. A keypad will pop up so you can enter the address. When finished, press the return key to close the keypad. The email address should show up in the grey box for Recipient 1. Press the Close button when complete. (See Figure 6G.)
6. PLC Watchdog Messaging Setup and Operation

7. Press the radio button next to “Send to Cellular”. This display will look like this as shown in Figure 6H.

8. Select the radio button for the cellular carrier for the number you want to send a message to. Then click on the blue Cellular Number window to enter the phone number, including area code. Do not include dashes, only numbers. After hitting the return key, the phone number should show up in the grey Recipient field with the carrier information appended to the number string. Select Close when finished. (See Figure 6I.)
9. Repeat the process for Recipient 2 if desired. Select Close when Recipient setup is complete. (See Figure 6J.)

![Figure 6J]

10. You should now be back at the Help/Info screen shown below. That concludes the message setup. (See Figure 6K.)

![Figure 6K]
7. Watchdog Google Account Access

Allow less secure apps must be set to “ON” for the PanelView to access your gmail account. This is only if you are using gmail to send the Watchdog messages.

![Figure 7A](image)

**VNC Applications**

- We recommend TightVNC Viewer if you want to connect to the PanelView with a computer on the same LAN. After installation on your computer, just point the application to the LAN IP address of the PanelView. (You must be connected to the same network as the PanelView.)
- TightVNC Viewer is a free program that can be downloaded here: [http://www.tightvnc.com/download.php](http://www.tightvnc.com/download.php)
- For mobile devices, there are a number of VNC apps available for download. We have used VNC Viewer by RealVNC with success. Just install the app and point it to the WAN IP address (not the LAN IP address) where the PanelView resides.
8. Warranty

GSI Group, LLC Limited Warranty

The GSI Group, LLC ("GSI") warrants products which it manufactures to be free of defects in materials and workmanship under normal usage and conditions for a period of 12 months after sale to the original end-user or if a foreign sale, 14 months from arrival at port of discharge, whichever is earlier. The end-user’s sole remedy (and GSI’s only obligation) is to repair or replace, at GSI’s option and expense, products that in GSI’s judgment, contain a material defect in materials or workmanship. Expenses incurred by or on behalf of the end-user without prior written authorization from the GSI Warranty Group shall be the sole responsibility of the end-user.

Warranty Extensions:

The Limited Warranty period is extended for the following products:

<table>
<thead>
<tr>
<th>Product</th>
<th>Warranty Period</th>
</tr>
</thead>
<tbody>
<tr>
<td>AP Fans and Flooring</td>
<td></td>
</tr>
<tr>
<td>Performer Series Direct Drive Fan Motor</td>

</tbody>
</table>

GSI further warrants that the portable and tower dryer frame and basket, excluding all auger and auger drive components, shall be free from defects in materials for a period of time beginning on the twelfth (12th) month from the date of purchase and continuing until the sixtieth (60th) month from the date of purchase (extended warranty period). During the extended warranty period, GSI will replace the frame or basket components that prove to be defective under normal conditions of use without charge, excluding the labor, transportation, and/or shipping costs incurred in the performance of this extended warranty.

Conditions and Limitations:

THERE ARE NO WARRANTIES THAT EXTEND BEYOND THE LIMITED WARRANTY DESCRIPTION SET FORTH ABOVE. SPECIFICALLY, GSI MAKES NO FURTHER WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING, WITHOUT LIMITATION, WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR USE IN CONNECTION WITH: (I) PRODUCT MANUFACTURED OR SOLD BY GSI OR (II) ANY ADVICE, INSTRUCTION, RECOMMENDATION OR SUGGESTION PROVIDED BY AN AGENT, REPRESENTATIVE OR EMPLOYEE OF GSI REGARDING OR RELATED TO THE CONFIGURATION, INSTALLATION, LAYOUT, SUITABILITY FOR A PARTICULAR PURPOSE, OR DESIGN OF SUCH PRODUCTS.

GSI shall not be liable for any direct, indirect, incidental or consequential damages, including, without limitation, loss of anticipated profits or benefits. The sole and exclusive remedy is set forth in the Limited Warranty, which shall not exceed the amount paid for the product purchased. This warranty is not transferable and applies only to the original end-user. GSI shall have no obligation or responsibility for any representations or warranties made by or on behalf of any dealer, agent or distributor.

GSI assumes no responsibility for claims resulting from construction defects or unauthorized modifications to products which it manufactured. Modifications to products not specifically delineated in the manual accompanying the equipment at initial sale will void the Limited Warranty.

This Limited Warranty shall not extend to products or parts which have been damaged by negligent use, misuse, alteration, accident or which have been improperly/inadequately maintained. This Limited Warranty extends solely to products manufactured by GSI.

Prior to installation, the end-user has the responsibility to comply with federal, state and local codes which apply to the location and installation of products manufactured or sold by GSI.

9101239_1.CR_rev8.DOC (revised January 2014)
This equipment shall be installed in accordance with the current installation codes and applicable regulations, which should be carefully followed in all cases. Authorities having jurisdiction should be consulted before installations are made.
