SAFETY INFORMATION
PLEASE READ

WATCH FOR THIS SYMBOL! IT POINTS OUT IMPORTANT SAFETY PRECAUTIONS. IT MEANS, "ATTENTION ---- BECOME ALERT! YOUR SAFETY IS INVOLVED!"

It is recommended that you review the entire contents of this manual, paying particular attention to items preceded by this symbol. FAILURE TO HEED THESE INSTRUCTIONS CAN RESULT IN PERSONAL INJURY!

OPERATOR QUALIFICATIONS

Operation of this farmstead equipment shall be limited to competent and experienced persons. In addition, anyone who will operate or work around power equipment must use good common sense. In order to be qualified, he must also know and meet all other requirements, such as:

1. Some regulations specify that no one under the age of 16 may operate power machinery. This includes farmstead equipment. It is your responsibility to know what these regulations are in your own area or situation.
2. Current OSHA regulations state in part: "At the time of initial assignment and at least annually thereafter, the employer shall instruct every employee in the safe operation and servicing of all equipment with which the employee is, or will be involved."
3. Unqualified persons are to stay out the work area. The "Work Area" is defined as any area within the storage bins where this equipment is installed.
4. A person who has not read and understood all operating and safety instructions is not qualified to operate the machine.

*Federal Occupational Safety & Health Standards for Agriculture Subpart D, Section 1928.57 (a)(6).
CAUTION

BE A SAFE OPERATOR

1. Read and understand the Owner’s Manual.
2. Disconnect all electrical power before servicing or opening control box, adjusting, or lubricating the equipment.
3. All electrical hook-ups should be in accordance to the National Electrical Code.
4. Ground all electrical equipment as well as bin itself.
5. Only knowledgeable and trained personnel should operate this equipment.
6. NEVER WORK IN THE DRYER WITH POWER “ON” AND CONTROLS IN “AUTO”... automatic controls start without warning! Stay clear of motors, belts and augers.

FAILURE TO FOLLOW THESE INSTRUCTIONS MAY RESULT IN PERSONAL INJURY OR PROPERTY DAMAGE.

THE DECALS SHOWN ON THIS PAGE MUST BE DISPLAYED AS SHOWN
REPLACEMENTS ARE AVAILABLE UPON REQUEST

Write to: DMC
1004 E. Illinois St.
Assumption, IL 62510
Phone: 217-226-5100

Please note:
1. The decal on this page is NOT actual size.
2. Keep all decals wiped clean at all times.
3. All decals must be replaced if they are destroyed, missing, painted over, or can no longer be read.
CALC-U-DRI PRINTER INSTALLATION

1. Disconnect all power to the control box to which you are adding the printer option.

2. Mount the printer box within two feet of the control box to use the standard length of wire provided. The unit can be located in a remote location if special wire length is ordered.

3. Four (4) additional holes (three 7/8” diameter and one 1-3/32” diameter) are required for the printer installation. Check the bottom of the control box and add these holes if they are not already provided.

4. Use approximately four (4) feet of liquid tight conduit and connectors between the printer and control box. Feed the printer control cable (five conductor) from the printer box to the control box (the 25 pin connector will be in the printer control box). This does not apply if the printer is installed within a large control box.

5. Pull out the circuit board carefully. When adding this printer option to the Calc-U-Dri control box, the control board requires that the dip switches be set. Please follow the guide on page 9.

6. Install the two (2) card guides in the double card holder beside the guides that are already installed.

7. Connect the black 36-pin connector as shown in Drawing 1 on page 8. The eleven wires shown on the letter side are already attached to the green connector (approximately 5 inches long with black heat shrink on the ends). Untie these wires from the harness, remove heat shrink and strip 5/8”. Connect orange wire to terminal V, violet wire to terminal U, etc. Be sure the larger green wire is installed in “H”.

8. Secure the black connector to the card holder with (2) #4-40x1-1/4 screws, lock washers and nuts. DO NOT OVER TIGHTEN. See Photo 1.

9. Attach the five wires from the printer control cable to the black 36-pin connector pins 13, 16, 17 and 18. See Drawing 1.
10. To mount the plenum temperature sensor, cut a 1-1/4 inch diameter hole in the dryer plenum. Secure the liquid tight and sensor using conduit straps. See Photo on page 7. Wire the temperature sensor into the black connector. Pin #5 to white and #6 to red. See Drawing 1 on page 8.

11. To mount the weather sensor, feed the cable through the 1-3/32 inch diameter hole in the bottom of the control box and secure with the electrical screw bushing. Have the sensor on the outside of the control box. Wire the cable to the black 36 pin connector pins 7 to 11. See Drawing 1.

NOTE:
If the control box is mounted indoors, mount the weather sensor outdoors. The weather sensor obtains ambient temperature and relative humidity data.

12. Plug in the 25-pin connector to the printer assembly. See Photo 2. Provide 115 Volts AC to the printer control box terminals marked L1 (Line), N (Neutral), and GND (Ground). The power source can come from an external source or from the control box. Wire and conduit are provided for the AC power. Do not run the 25 pin control cable in the same conduit as the 115 Volts AC.

13. Put cable ties approximately every four inches to hold all the loose wires and cables in place. Do not tie any of these wires to the AC leads.

14. Remove the shipping tape and foam from the printer paper and spool.

15. Install the control boards. The control board with the batteries will be installed in the black edge card connector. Be sure that both cards are firmly seated. See Photo 1.
SERVICE

The printer control board contains two alkaline AA batteries. It is recommended to replace the batteries every year to eliminate possible corrosive leakage.

If the printer requires service, unplug the 25 pin connector and remove all the wires from the orange terminal. Remove the six bolts that secure the printer. This will be serviced as a complete module. Re-install the new / repaired unit and wire the orange terminal as per the decal. Plug in the 25-pin connector.

CALC-U-DRI PRINTER DEFINITIONS

1. Two Amp Fuse: DO NOT OVERSIZE! Use only AGC2 fuses.

2. Power On Indicator Lamp: Indicates the power switch is “on” and 115 Volts A.C. is present.

3. Power Switch: When “on”, this puts 115 Volts A.C. to the printer power supply. The printer requires 5.0 Volts D.C.

4. Thermal Printer Paper: Provides a written record of the moisture of the grain (temperature corrected), grain temperature, bin number, plenum temperature, humidity, ambient temperature, date and time of day, grain type, and average grain moisture.

5. Printer Keyboard: Used for programming the printer to determine the print interval and bin number to correct date and time to change to a different grain type, and to restart the averaging.

6. For Printout definitions see the next two pages for complete description.
A "Cold Start" occurs when batteries are not installed or are weak and need replacing (approximately every year.)

This data needs to be entered for operation.

If entry is not accepted the question is repeated. Acceptable number inputs are:

- MM = month 01 thru 12
- DD = day 01 thru 31
- YY = year 00 thru 99
- HH = hour 01 thru 12
- MM = minute 01 thru 60

Prints out your entered information.

Automatically set at five minutes. Can be set from two minutes thru 30 minutes.

Automatically set at "1", can be numbered up to 999.

Menu is printed when any key is pushed.

Data entered at cold start. Battery backup, even with power loss.

Enter if other grain is run:

1 - corn
2 - milo
3 - rice
4 - wheat
5 - soybeans
6 - sunflower
7 - other

Set from menu.

From weather station input at time of printing. Reads "0" when not hooked up.

Header always printed after menu, every two hours of running time, Moisture Limit Change, and Moisture Offset Change.

Any time you want to go to the menu, hit any key on the keyboard. This will interrupt the printing and print the menu.

NOTE: After you are finished using the menu, press "1" to again begin the readout. This will not affect the averaging, unless you had reset the averaging.
NOTE:
The batteries need replacing every year, use two “AA” alkaline batteries.

Turn off power to the unit, replace the batteries, then turn on power and reprogram if “Cold Start” notation is printed.
CALC-U-DRI PRINTER PARTS LIST

1. Board
2. Connector
3. Wire Harness
4. Power Supply
5. Display
6. Keypad

</tbody>
</table>
1. Never unplug or plug in the circuit board with power on.

2. Do not make field adjustments on the circuit board. This is a factory adjustment only.

3. Contact your dealer or DMC if you have any questions on the operation or service of your Calc-U-Dri Printer.

Take Time for Proper Installation
---
It Saves Service Calls
The GSI Group, Inc. Warranty

THE GSI GROUP, INC. ("GSI") WARRANTS ALL PRODUCTS WHICH IT MANUFACTURES TO BE FREE OF DEFECTS IN MATERIAL AND WORKMANSHIP UNDER NORMAL USAGE AND CONDITIONS FOR A PERIOD OF 12 MONTHS AFTER RETAIL SALE TO THE ORIGINAL END USER. THE PURCHASER’S SOLE REMEDY AND GSI’S ONLY OBLIGATION SHALL BE TO REPAIR OR REPLACE, AT GSI’S OPTION AND EXPENSE, PRODUCTS THAT, IN GSI’S SOLE JUDGMENT, CONTAIN A MATERIAL DEFECT DUE TO MATERIALS OR WORKMANSHIP. ALL DELIVERY AND SHIPMENT CHARGES TO AND FROM GSI’S FACTORY WILL BE PURCHASER’S RESPONSIBILITY. EXPENSES INCURRED BY OR ON BEHALF OF THE PURCHASER WITHOUT PRIOR WRITTEN AUTHORIZATION FROM AN AUTHORIZED EMPLOYEE OF GSI SHALL BE THE SOLE RESPONSIBILITY OF THE PURCHASER.

EXCEPT FOR THE LIMITED WARRANTY EXPRESSED ABOVE, GSI MAKES NO FURTHER WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING, WITHOUT LIMITATION, WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR USE IN CONNECTION WITH (i) PRODUCT MANUFACTURED OR SOLD BY GSI OR (ii) ANY ADVICE, INSTRUCTION, RECOMMENDATION OR SUGGESTION PROVIDED BY AN AGENT, REPRESENTATIVE OR EMPLOYEE OF GSI REGARDING OR RELATED TO THE CONFIGURATION, INSTALLATION, LAYOUT, SUITABILITY FOR A PARTICULAR PURPOSE, OR DESIGN OF SUCH PRODUCTS.

GSI SHALL NOT BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL OR CONSEQUENTIAL DAMAGES, INCLUDING, WITHOUT LIMITATION, LOSS OF ANTICIPATED PROFITS OR BENEFITS. PURCHASER’S SOLE AND EXCLUSIVE REMEDY IS AS SET FORTH IN THE LIMITED WARRANTY EXPRESSED ABOVE, WHICH SHALL NOT EXCEED THE AMOUNT PAID FOR THE PRODUCT PURCHASED. THIS WARRANTY IS NOT TRANSFERABLE AND APPLIES ONLY TO THE ORIGINAL PURCHASER. GSI SHALL HAVE NO OBLIGATION OR RESPONSIBILITY FOR ANY REPRESENTATIONS OR WARRANTIES MADE BY OR ON BEHALF OF ANY DEALER, AGENT OR DISTRIBUTOR OF GSI.

GSI ASSUMES NO RESPONSIBILITY FOR CLAIMS RESULTING FROM ERECTION DEFECTS OR UNAUTHORIZED MODIFICATIONS TO PRODUCTS WHICH IT MANUFACTURED. MODIFICATIONS TO PRODUCTS NOT SPECIFICALLY DELINEATED IN THE MANUAL ACCOMPANYING THE EQUIPMENT AT INITIAL SALE WILL NULLIFY THE PRODUCT WARRANTY THAT MIGHT HAVE BEEN OTHERWISE AVAILABLE.

THE FOREGOING WARRANTY SHALL NOT EXTEND TO PRODUCTS OR PARTS WHICH HAVE BEEN DAMAGED BY NEGLIGENT USE, MISUSE, ALTERATION OR ACCIDENT. THIS WARRANTY EXTENDS SOLELY TO ONLY PRODUCTS MANUFACTURED BY GSI. THIS WARRANTY IS EXCLUSIVE AND IN LIEU OF ALL OTHER WARRANTIES EXPRESS OR IMPLIED. GSI RESERVES THE RIGHT TO MAKE DESIGN OR SPECIFICATION CHANGES AT ANY TIME.

PRIOR TO INSTALLATION, PURCHASER HAS THE RESPONSIBILITY TO COMPLY WITH ALL FEDERAL, STATE AND LOCAL CODES WHICH MAY APPLY TO THE LOCATION AND INSTALLATION OF PRODUCTS MANUFACTURED OR SOLD BY GSI.
This Equipment shall be installed in accordance with the current installation codes and applicable regulations which should be carefully followed in all cases. Authorities having jurisdiction should be consulted before installation occurs.
